# Personal Story

*"While I was a mother of three young children, I got an aggressive form of acute leukemia. I looked right into Death's eyes twice, underwent utterly inhumane treatments, received a stem cell transplantation and miraculously managed to survive. There was no complaining; I was full of optimism because I knew that I wasn't finished here yet. And so it came to pass! I recovered from the disease and all the side effects, lovingly divorced the father of my children and started a new life. One year later in July 2019 I moved to Ibiza with my three kids and business. It wasn't easy, but it felt completely right."*
